

GAS SAFETY UK - PRODUCT DATA SHEET

LOW COST, HIGH PURITY CYLINDER GAS REGULATORS

Cost-effective safety solutions for users of high purity (up to 99.999%) cylinder gases.

P1 = 300 barG x P2 [range] 0.1 - 3 barG or 0.5 - 10 barG

Constructed from plated brass with stainless steel diaphragms and PCTFE (Kel-F) valve seats
EN 562 safety-pattern pressure gauges. Helium leak rate = 1×10^{-7} .

Special gases are expensive. True enough. Special gas regulators are expensive. Traditionally this has been the way of things. This solution from Gas Safety UK breaks the mould without sacrificing quality or safety.

LIST PRICE = £160.00 + VAT & Carriage.

As with all of our regulators each 'LCHP' regulator is shipped with a RegTag (including serial number, date of manufacture and date of expiry) and individual certification.

Compatibility: oxygen, nitrous oxide, helium, argon, nitrogen, air, carbon dioxide, methane, hydrogen, etc. and mixtures of these gases. The LCHP regulator is NOT for use with corrosive gases or acetylene.
